**WATS Feature Release Note
User Manual**

Major Feature Areas

User Manual 3

User Manual

This new feature includes a new user manual system integrated into WATS. The new system can be opened from the top bar “Help and Documentation” dropdown. Navigate through the categories and files or search topics through the input. In the top left corner, you can go through your history (last 10 pages) by clicking on the previous and next arrows. If you want to open a new page, click “Open in new tab” or use the shortcut (ctrl + click) to open a new tab.
